

SOMETIMES, BEFORE YOU FIGHT A FIRE, YOU HAVE TO FIRST GUESS WHICH EXTINGUISHER TO USE.

Fires are categorised into different classes with a different extinguisher to fight each type of fire. An untrained person is expected to look at the fire, evaluate its class, decide on the appropriate fire fighting equipment and then proceed to fight the fire. At the time of crisis this can cause confusion, waste time and be extremely dangerous.

If a Class A extinguisher, which is water based, is used on an electrical fire, it can lead to instant electrocution. If a Class A extinguisher is used on an oil/petrol based fire, the oil will float on the water and the fire will instantly spread. If a Class B/C extinguisher is used on a Class A fire, it will have no effect whatsoever.

The Endfire ABC extinguisher actually works on all classes of fire.

It contains an agent more powerful than the agents normally used in other fire extinguishers, which is applicable on all classes of fire. Making it ideal for zones not restricted by BIS norms. Made to the highest international standards, the Endfire ABC extinguisher conforms to the IS specification No.13849-1993 and British Standard No. 5324.

The Endfire ABC extinguisher is extremely simple to use.

Just pull the safety seal and press the lever down - a simple two-step activation process. It also has a unique controllable discharge mechanism. By simply pressing down and releasing the lever, the flow of the extinguishing agent can be controlled, allowing the user to fight multiple fire points without wasting precious extinguishing agent.

EASY PULL TO UNLOCK!

It is a No Maintenance extinguisher.

Other extinguishers require quarterly/annual maintenance checks and costly annual replacement of working parts and extinguishing agents to ensure that they stay

READY TO USE WHEN NEEDLE IS IN GREEN ZONE

in working condition. The annual cost of maintaining an extinguisher is as much as 50% of the cost of the extinguisher.

The Endfire ABC extinguisher has a unique pressure gauge that indicates whether it is in working condition or not. If the indicator is in the green zone, it is in working condition.

WHEN NEEDLE IS IN RED ZONE IT INDICATES USAGE OR NEED OR RECHARGING

If the indicator is in the red zone, it indicates it has been used or it needs to be recharged/refilled.

Thus maintenance is restricted to the observation of this gauge which saves recurring costs.

The only Endfire extinguisher comes with a 5-year warranty!

This covers all functional aspects of the product including leakage, powder consistency and construction of the cylinder. Any replacements or refilling, except for actual use, are done free of cost!

5 YEAR WARRANTY

The manufacturing process ensures that every single cylinder is 100% safe at all times.

Each Endfire ABC extinguisher goes through the same stringent manufacturing and quality control systems as the DCP and Co. range of extinguishers, ensuring that the extinguisher is 100% safe to use and in peak working condition at all times.

The Endfire ABC extinguisher is more powerful.

One Endfire ABC unit of 2 kgs will deliver the same power as a 9 litre water CO₂ extinguisher used on class A fires and a 2 kg DCP extinguisher used on class B/C fires, i.e. one extinguisher can do the work of many different extinguishers. This can result in cost saving, as only one type of extinguisher is needed.

Technical Data*

Contents	: ABC Powder - Mono Ammonium Phosphate
Can construction	: Mild Steel - Tested to 30 Kgs/Cm
pressurised by	: Nitrogen - pressurised to 15 Kgs/Cm
Discharge Capability	: More than 95%
Joints	: No joints on body
External Surface	: Red Glossy Powder Coated
Inside Surface	: Treated with lead tin alloy for Anti Corrosive protection

Technical Specification*

Capacity/Net in	1 Kg	2 Kg	5 Kg	10 Kg
Gross weight	2 Kg	3.5 Kg	8 Kg	13.4 Kg
Diameter of can	80 mm	108 mm	140 mm	155 mm
Height of Can	385 mm	410 mm	500 mm	550 mm
Discharge time	6-10 Secs.	6-12 Secs.	15-25 Secs.	15-30 Secs.
Jet Range	3-4 mtrs.	3-4 mtrs.	4-5 mtrs.	4-6 mtrs.

* Specification may change without prior notice
